

Better Chemistry. Better Business.

Industrial Metal Stripping

Hubbard-Hall's metal stripping solutions offer increased efficiency with non-electrolytic, immersion chemistries to rapidly strip metal that is electro or electroless plated without impacting the base metal.

Stripol NI Ultra

A single component liquid designed to rapidly strip nickel and nickel alloys.

- Non-regulated, single component liquid
- No phosphates, fluorides, cyanides or caustics
- Excellent thermal stability
- Non-fuming
- Long bath life

Stripol CBR

Effectively strips electroplated nickel from copper and copper alloys.

- Free flowing
- Non-regulated powder
- Easily waste treated
- Long bath life
- Fast stripping rate

Cuprastrip System

Removes copper electro plate from ferrous metals.

- Rapid stripping rate
- Will not attack ferrous metals
- Easy to make up and operate
- No cyanides
